DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,478,692.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the same recited materials, thicknesses and natural frequency ranges are being claimed.

3. Claims 3-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being

Art Unit: 3711

unpatentable over claims 1-12 of U.S. Patent Number 6,478,692 in view of U.S. Patent Number 5,497,995 (Swisshelm).

The limitations regarding the striking plate material, its thickness, natural frequency ranges and club volume range of instant claims 3-6 are within the scope of the '692 patent and the claims differ only for the added limitation of scorelines on the striking plate. However, Swisshelm teaches at column 4, lines 20-24, that it is old and well-known in the golfing art to provide scorelines on the striking face of a wood-type club in order to increase the spin on the ball upon impact.
